

Kotlin Assignment-2

Problem 1: Write a program to add two integers in Kotlin.

Code: Using the Addition arithmetic operator-

```
fun main() {  
    val num1=30  
    val num2=40  
  
    val sum= num1 + num2  
    println("The sum of two numbers is:"+sum)  
}
```

Problem 2: Program to print half pyramid using *.

Output:

```
*  
* *  
* * *  
* * * *  
* * * * *
```

Problem 3: Write to print a half pyramid using numbers in increasing order.

Output:

```
1
2 3
4 5 6
7 8 9 10
11 12 13 14 15
```
